EMERGENCY IN THIS AREA!

High School students urgently needed to help save our crops—help feed our fighting men

Why an emergency? The crops are heavy this year. *And there is only a handful of regular cannery workers available.* We must, therefore, depend on the parents and high school students in this area to help. Over a billion cans of food are needed for our fighting men in the Pacific—there will be less food here at home if the crops are lost.

Is experience necessary? You don't have to have experience to work in a cannery—the canneries will train you. Many of you students, with no experience, did cannery work last summer, and did it well. You, and many more of your friends, are needed again this summer.

What will you earn? You'll be paid the same high wage paid to adult men and women. This year you won't find better pay elsewhere.

What is cannery work like? Jobs commonly done by women and girls consist of sorting, peeling, or cutting fruits and vegetables—coring, slicing, or pitting fruits—filling and labeling cans, etc. Some of this work is done by hand, some by machines.

Men and boys handle boxes or cases, operate hand and electric trucks, place cans in cases, operate labeling and other machinery, and do general cannery work.

Are there instructors to help you? Yes. They'll make you feel right at home, and show you the easiest ways to do your work. Friendly workers, and the cheerful atmosphere will make your time on the job pleasant.

When are you needed? July, August and September are the months of the emergency, but the peak rush comes in July. *The crops must be canned then or lost.* We want your name on our list now so we can call you when you are needed.

Where to register? There are two things you must do to sign up for cannery work. First, go right now to your school counsellor and get a work permit, and second, register at the U. S. Employment Office or the cannery nearest your home. Tell them you plan to work, and the hours you can work.

IMPORTANT!

Ask your school counsellor or phone or write any U. S. Employment Office for a free booklet about Cannery Work. *It answers all your questions about work in canneries and gives the names, addresses and phone numbers of canneries nearest your home.*

Sign up *now* for Summer Cannery Work

Lots of folks are curious about our new Chevron Gas Station. So here are the answers to the questions you've been asking—the story of how Standard of California is helping us establish our identity as an independent merchant.

1 No, our gas station hasn't changed hands. The new name, the new paint job are just to establish us as an independent businessman. Lots of folks who like the personal service they get at an independent gas station didn't know we were "home-owned." We've taken this means of making the fact plain.

2 You bet we'll continue to handle Standard products. We want to offer our customers the finest—and that means Standard Gasoline and motor oils. Our service and accessories will be just the same, too.

3 Sure, we'll honor Standard credit cards for private motorists when wartime restrictions are eased. And, right now, holders of Standard credit cards for governmental agencies and trucks can be sure of prompt expert service from us.

Get rid of this
Electric Octopus
with
ADEQUATE WIRING

You have seen an Electric Octopus or perhaps you even have one in your own home. It is a make-shift electric service by using a "clumsy" triple plug and running a clock, radio and lamp all from one electric outlet. The octopus outlet is a sure sign of house wiring that is lacking in enough circuits or outlets in the right places for modern and convenient service. • So look ahead ...in your present home or the new home you plan to build. Plan for adequate wiring to run all of your electric appliances with full power and at lowest cost. Put adequate wiring down as a first MUST in your 194X home plans. You'll find it saves more money than it costs.
